MANUFACTURER DECLARATION

BRUNA

C/ Recta de Heras, 7 · 39619 San Salvador · Cantabria · España

Directive 2014/68/EU - Article 4(3)

Sound engineering practice

Manufacturer:

BRUNA · Roberto Bruña, S.L.

This manufacturer declaration is issued under the sole responsibility of the manufacturer.

Description and identification of the pressure equipment / accessory:

BRUNA nozzles for cleaning sewers, pipes, manholes and special applications using pressurised water

Fixed / conventional nozzles · Mechanical / rotating nozzles · Vibrating nozzles

Root cutters · Manhole cleaning · Camera nozzles · Special nozzles

Commercial families covered in accordance with technical file BR-QA-PMA-001 - Rev. 11

Applicable Union harmonisation legislation:

Directive 2014/68/EU of the European Parliament and of the Council of 15 May 2014 on the making available on the market of pressure equipment.

Classification and design limits:

PS (maximum allowable pressure): 500 bar for fixed / conventional nozzles, root cutters and special nozzles · 350 bar for mechanical / rotating and vibrating nozzles

TS (maximum allowable temperature): 100 °C for fixed / conventional nozzles, root cutters and special nozzles · 70 °C for mechanical / rotating and vibrating nozzles

DN / reference size: depending on model, nominal connection from 1/8” to 1 1/4” (approx. DN 6 to DN 32)

Fluid group: Group 2 (water)

Category under Article 13 and Annex II: Article 4(3) (SEP / sound engineering practice)

Conformity-assessment procedure / module: no CE module applicable; manufactured in accordance with Article 4(3) (SEP)

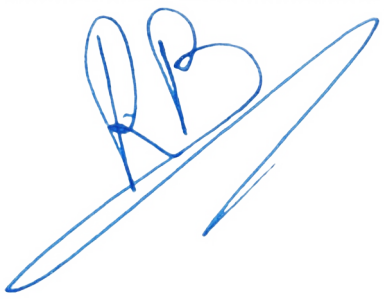

Technical specifications used:

BRUNA internal specifications for design, manufacturing, calibration, inspection and pressure testing. Technical file BR-QA-PMA-001 - Rev. 11 and qualification test reports dated 11/07/2025, 14/07/2025, 15/07/2025, 16/07/2025 and 17/07/2025. EN ISO 12100:2010 for the assessment of risks related to use, where applicable.

Notified body: Not applicable
